OUR STORY

At Neomed, we are committed to novelty and excellence, that's why we aspire for new and innovative ways to improve our solutions and services. Our long-term relationships with the medical community allow us to stand out in the way we do business.

We understand the challenges and opportunities that medical professionals face, and we are committed to providing them with the support and resources they need to succeed. We believe that lasting business success is the result of successful partnerships.

2010

Neomed was established in Lebanon by founder Pierre Helou a leading provider of food supplements, vitamins, and minerals.

The company was established with the belief that essential bodily functions, such as fighting infections, wound healing, and regulating hormones, cannot be achieved without proper vitamins & minerals levels.

Neomed's focus on food supplements was ahead of its time. In the early days of the company, the market for food supplements was in its infancy. Neomed is a shining example of a company that is committed to making a positive impact on the health and well-being of people.

2015

Working in Saudi Arabia has given our team invaluable expertise and regional exposure in the aesthetics market, particularly among dermatologists and plastic surgeons. This has allowed us to gain a deep understanding of consumer trends and needs, as well as the aspirations and standards of healthcare professionals. This knowledge is essential for carefully selecting the brands we represent and developing the right launch strategy for the region.

2020

Amidst the pandemic, Neomed Trading was established in the UAE as a pioneer in the field of innovation and technology in the aesthetics and medical field. Its first creation, the NEOPAL mobile app, is a cutting-edge solution that caters to the needs of medical institutions and clinics by helping them manage their day-to-day business more effectively and efficiently.

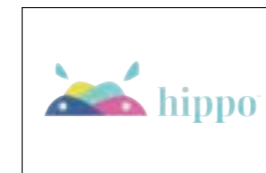

TODAY

Neomed is a leading provider of innovative and technological solutions for the aesthetics and medical field in the Middle East. With close partnerships with more than seven world-renowned suppliers, Neomed is constantly launching new products and services, such as the NEOPAL mobile app, NEOPAL.co training platform with HIPPO virtual care, SWIFT microwave therapy for the skin, Revivv hair serum, TO:L for hands and feet care, Bryght whitening system, and myNeomed consumer portal. Neomed is committed to expanding its reach throughout the region and its focus on innovation and technology has propelled it to the forefront of the industry.

OUR PARTNERS

We have established strong relationships with key opinion leaders (KOLs), societies, government entities, the media, and world-renowned suppliers and companies. These partnerships enable us to stay ahead of the curve on the latest trends and technologies, and to provide our clients with the best possible solutions.

Award-Winning Microwave therapy for common and plantar warts

With treatment times in seconds, SWIFT provides clinicians a new, precise and easy way for treating skin lesions.

swift

by emblation

Infected tissue can exist several millimetres below the surface and can often be difficult to treat using traditional methods, resulting in either untreated tissue or significant damage.

Swift delivers a precise, highly controlled energy dose. As microwaves travel into the tissue, water molecules begin colliding and creating localised heat energy.

In just seconds the treatment is complete and the healing cascade begins immediately. Treated tissue is quickly replaced, repaired and regenerated.

Services

Any service you might need starting from Maintenance, Marketing, Consultancy or Training

Resources

Easily download marketing resources like videos, pdf, images and more

Hippo's hands-free, voice-activated, wearable computing solutions deliver a “through the eyes of the clinician” viewpoint allowing healthcare practitioners to communicate in real time with remote colleagues:

In the Field: First responders to a trauma scene can get expert advice from specialists back in the ER, or Control Center enabling potentially life-saving instructions to be delivered in real-time, and faster triage on arrival.

In the Hospital: The HVC platform can be used for ongoing skills training and assessment and allows for remote proctoring, evaluation and calibration of procedures and skills through a first-hand view of the patient.

At Home: Hippo brings a new dimension to telehealth in the home, allowing a caregiver to be guided by a specialist when caring for a patient at home. Bluetooth-enabled peripheral devices allow for real-time transmission of key biometric data directly to the attending clinician.

For Saudi Arabia Only

An exclusive **Training Platform** providing access to world-renowned trainers in the fields of Aesthetics, Dermatology, and Plastic surgery.
